

barrel & drum wash

The TECHNIJET unique high pressure barrel/drum wash system has been designed to suit the individual customer needs across a wide range of industrial and commercial applications.

Capable of achieving the highest quality wash for all open top plastic or steel drums and barrels from 30 to 205 litre capacities.

The unique high pressure water jet design eliminates the need for brushes that are integral to conventional systems therefore dramatically reducing running costs.

- High quality cleaning of open top drums both inside and out.
- Effectively cleans drum sizes from 30 litres to 205 litres.
- Manual or automatic operation.
- Fully enclosed construction.
- Unique spray nozzle releases high impact water pressure at 150bar.
- Wash achieved in less than 2 minutes.

technical data	
Drum Wash Time	1 – 2 min
Water Pressure	150 bar (max)
Power Supplies	400-420v 50HZ
Power Rating	45 Amps
Water Consumption	50 litre/min
Water Connection	3/4" 2-4 bar
Air Supply	2-8 bar (6mm)
Discharge Connection	50mm
